

CaFloor DIBA System accessories Sleeves

€ 24

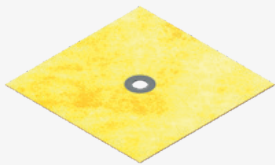

The perfect complement to the CaFloor DIBA sealing membrane, especially for damp rooms: **Sealing sleeve with a particularly elastic expansion zone for the sealing of pipe penetrations in accordance with the applicable standards.**

The highly flexible core material is alkali and perforation-resistant as well as waterproof. It guarantees a durable, elastic and secure adhesive bond with all liquid and sheet sealing materials.

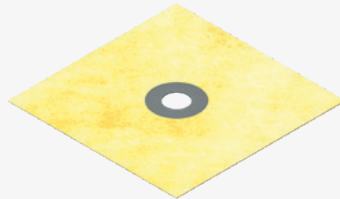

Fleece that is laminated on both sides protects against surface roughness and forms the ideal foundation for subsequent tiling work.

TECHNICAL DATA

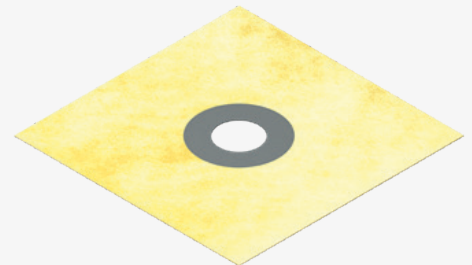

Material	PP - fleece, white / Flexible thermoplastic / PP - fleece, white
